

A
JCB TELETRUK
IN
YOUR YARD
FOR
2004
MAKES
GOOD SENSE..

..WHICHEVER
WAY
YOU LOOK
AT IT

THE JCB TELETRUK
OFFERS SUCH
GOOD VALUE ...

These 2- and 4-wheel-drive machines were photographed across Europe last summer and show how versatile the JCB Teletruk is, whether it's speedily bag filling using the Biggame trapdoor shovel, quick changes of attachments, or a quick stretch to unload a lorry from one side instead of two.

The JCB Teletruk is an all-round materials handler, not just a forklift.
So a Teletruk in your yard will make good business sense.
**versatility .. compact size .. 4 wheel drive ..
telescopic reach .. rapid attachment changeover**

JCB
A Product
of Hard Work

NOW IT'S EASY TO SEE WHY...

The JCB Teletruk now comes with a new slimline boom.
So the operator's view of the forks is vastly improved.

The benefit of less heavy metal is plain to see. Slimming down the width by 15% puts the left fork into view, whilst the structural re-design also creates a clear window out to the right fork.

To see more of the JCB Teletruk with the new slimline boom, please cut out this coupon and post it to :

JCB Teletruk Information Centre, PO Box 50, Uttoxeter, Staffordshire ST14 8BR
